

R glass silk insulated pure nickel stranded wire 400V, 2,50 mm², + 750°C

Application:

Special glass silk cable for connecting and wiring electric heating devices

Construction:

Conductor: Stranded pure nickel wire,

50 x 0,25 mm, A = 2,50 mm²,

conductor diameter approx. 2,05 mm

Insulation: R glass silk covering,

R glass silk braiding

Impregnation with silicone resin

Outer diameter: 3,50 ± 0,20 mm

Core coding: natural

Technical specifications:

Nominal voltage: 400 V

Test voltage: 2000 V

(minimum breakdown voltage, in a ball bath, steel ball Ø 2,00 mm, 1 min)

Temperature resistance: permanent Static: 750°C

Bending radius: 5 x OD

Resistance at 20°C: approx. 37 /1,000 m

Weight: approx. 34 kg/km

- Physiologically safe, halogen- and solvent-free
- If temperatures above 300°C are maintained for a long time, the resin impregnation will evaporate.
